

Project Title:
**MCIA RUNWAY OVERLAY – SEGMENT 5
PAINTING OF AIRFIELD PAVEMENT MARKINGS**

Location:
Mactan-Cebu International Airport, Lapu-lapu City

MISCELLANEOUS PROVISION

GUIDELINES

The Contractor shall establish a complete quality control program to adhere the following requirements while carrying out his function and responsibilities during the implementation of the contract.

1. QUALITY ASSURANCE

The Contractor shall establish a system of quality control program to assure that the requirement of the contract is provided as specified. One copy of the Contractor's quality control program shall be submitted to the Owner prior to the start of the contracted services. An updated copy must be provided as change occurs. The program shall include but not limited to the following:

- 1.1 An inspection system, covering all the services to be performed under the contract. This must specify areas to be inspected on, either a scheduled or unscheduled basis or such personnel who will perform the inspection.
- 1.2 A method for identifying differences in the quality of services rendered, before the level of performance becomes unacceptable.
- 1.3 The Owner's representative shall monitor the Contractor's performance under the contract.

2. SAFETY AND SECURITY MEASURES

The Contractor shall adhere to all standards and recommended practices stipulated by the airport authority and shall, under no circumstances, violate standard rules and regulations.

- 2.1 The Contractor and his employees shall comply at all times with the security and safety requirements imposed by the airport authority while on the airport premises.
- 2.2 The Contractor is hereby instructed that aircraft operations and movements and the safety thereof, shall at all times take precedence over any operation. In the case where the area is within restricted areas, A presence of authorized handheld radio operator is assigned and shall obtain clearance from the CAAP Control Tower and MCIAA Operations Center from time to time for thorough safety.
- 2.3 The Contractor shall, at all times keep paved areas such as runways, taxiways and hard stands, free from hazardous materials.
- 2.4 The Contractor shall, at all times provide visible warning devices within the premises of the work such as barricades, lighted signs, beacons, etc.
- 2.5 The Contractor shall, at all times observe CAAP Nav-Aids warning signs on all radio navigational instruments situated within the vicinity of the airport like Glide Slopes, Localizers, Very High-Frequency Omni Range (VOR), Radar, etc. for protection of the said instruments.

3. FACILITIES AND SERVICE UTILITIES

The airport management shall provide space, without cost to the Contractor, for its field office, storage and quarter facilities. However, the Contractor shall not make any alteration to the space provided except with the permission of the authorized official.

Utility services for power, water, telephone and sanitation availed during the performance of the contract shall be at the expense of the Contractor.

4. SERVICE VEHICLE

The Contractor shall make available, during the performance of the contract, service vehicles for use by Airport Authority's representatives/engineers for the purpose of inspection, monitoring, measuring, laboratory testing and other activities relative to the implementation of the project.
